

Urban Garden — A Greenery Exhibition.
Highlighting Design House Stockholm's Greenery Collection.

Grow

by Caroline Wetterling

Grow Greenhouse *by* Caroline Wetterling

A greenhouse for nature's smallest flowers, and a nursery for the plant's first stages of life. Caroline Wetterling's Grow is made of two glass parts. The bottom part holds the soil and the plant. The top part is a lid equipped with a spout, allowing it to be used as a watering can. It also functions as a valve that lets in air and regulates the moisture and temperature levels inside the greenhouse. Grow is made of hand-made glass.
